---

# Dolphin 6500 Mobile Computer

## Out of the Box

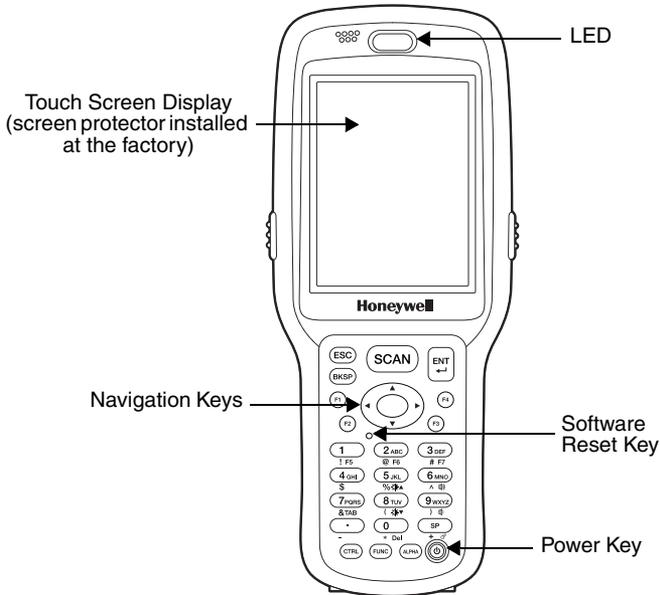

Verify that your carton contains the following items:

- Dolphin 6500 mobile computer (the terminal)
- Main battery pack (3.7v, Li-ion)
- AC power supply
- Localized plug adapters

*Note: Be sure to keep the original packaging in case you need to return the Dolphin terminal for service; see [page 6](#).*

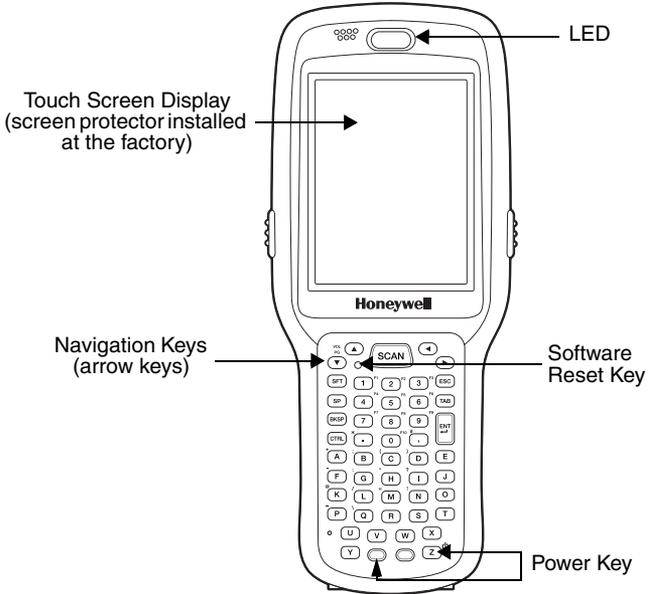

## Dolphin 6500 Front Panel

### 28-key keypad (numeric)

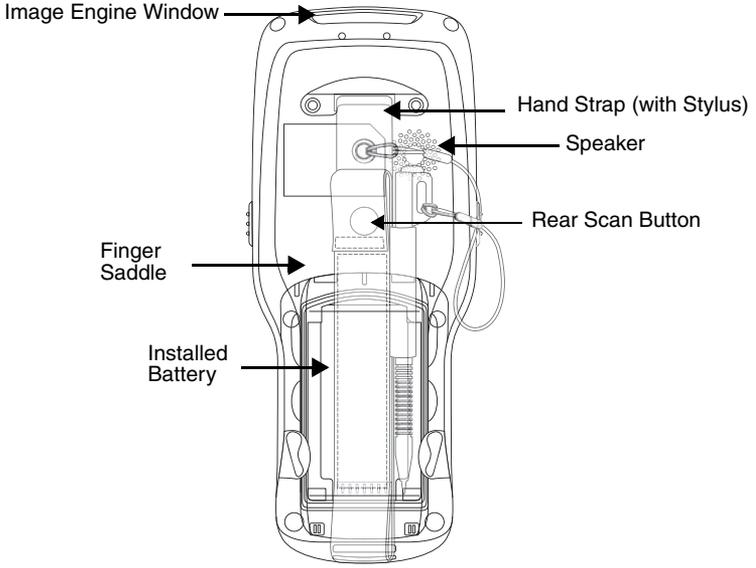

---

## 52-key keypad (alphanumeric)

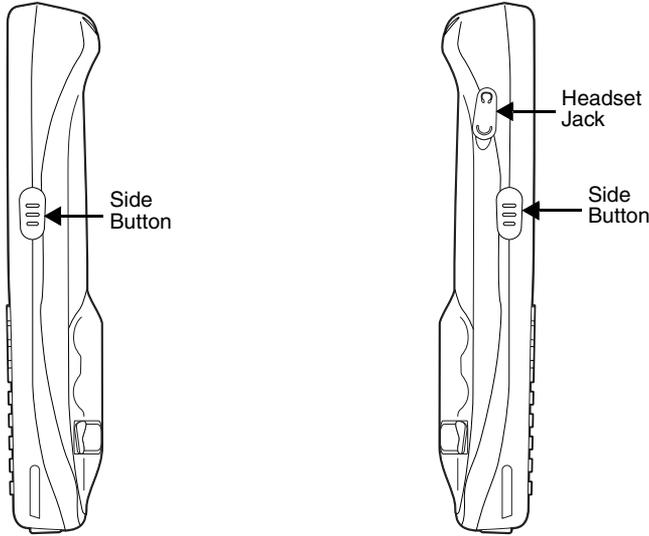

---

## ***Dolphin 6500 Back Panel***

## ***Dolphin 6500 Right and Left-Side Panels***

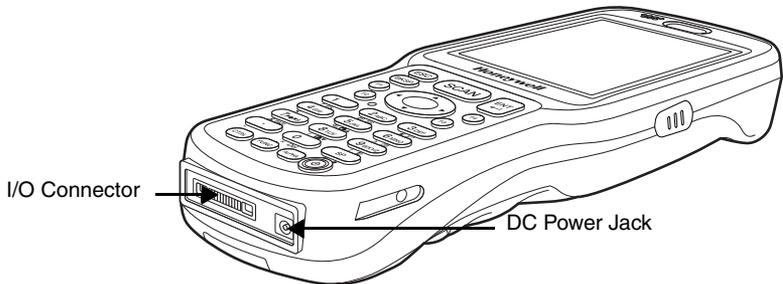

**Right Side**

**Left Side**

---

## Dolphin 6500 Bottom Connectors

### Step 1: Install the Main Battery

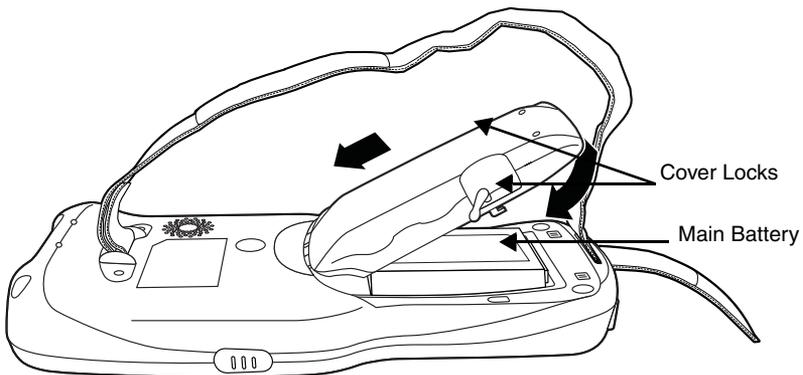

Ensure all components are dry prior to placing the battery in the terminal. Mating wet components may cause damage not covered by the warranty.

We recommend use of Honeywell Li-Ion battery packs. Use of any non-Honeywell battery may result in damage not covered by the warranty.

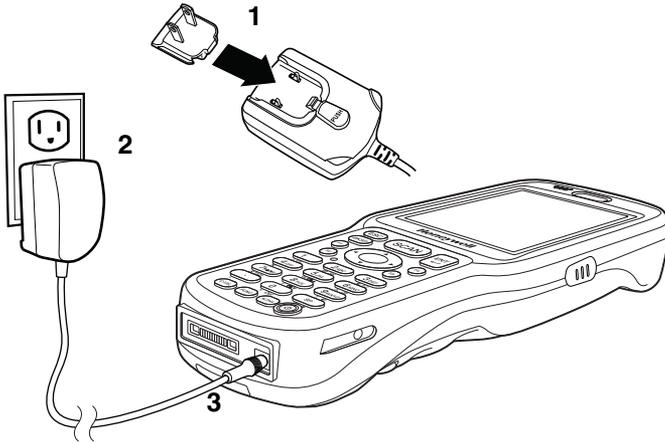

The 6500 is shipped with the battery packaged separately from the unit. To install the battery, release the hand strap, remove the battery door by turning the locks upward, insert the battery with the labels facing upward, and replace the battery door.

---

## Step 2: Charge the Batteries

Dolphin terminals ship with both the main battery pack and internal backup battery significantly discharged of power. Charge the main battery pack with the Dolphin charging cable for a **minimum of 5 1/2 hours before initial use.**

*We recommend use of Honeywell peripherals, power cables, and power adapters. Use of any non-Honeywell peripherals, cables, or power adapters may cause damage not covered by the warranty.*

## Step 3: Boot the Terminal

The terminal begins booting as soon as power is applied and runs by itself. Do NOT press any keys or interrupt the boot process.

When the boot process is complete, the Desktop appears and the terminal is ready for use.

## Resetting the Device

Soft Reset: Using the stylus, press the **Reset** button. The screen turns white and the decode/scan LED flashes blue for approximately 10 seconds.

Hard Reset:  
28-key: Press and hold the **Power** button and then using the stylus, press the **Reset** button.  
52-key: Press and hold the **Blue** and **Z (Power)** buttons and then using the stylus, press the **Reset** button. The screen turns white and the decode/scan LED flashes blue for approximately 18 seconds.
